CLAIMING BUSINESS-RELATED TAX CREDITS FOR INDIVIDUALS AND BUSINESSES

New Mexico offers certain business-related tax credits to individuals and businesses who meet the statutory requirements. The tax credits apply to the following tax programs: gross receipts tax (GRT), compensating tax (CMP), wage withholding taxes (WWT), non-wage withholding (NWT), corporate income tax (CIT), and personal income tax (PIT). This publication summarizes New Mexico business-related tax credits and the procedure for claiming them.

Please note: some of the credits have limited eligibility dates and some credits that are listed in the publication may not be available for future dates. The Taxation and Revenue Department (Department or Tax & Rev) cannot consider credit claims that are filed before or after dates specified in legislation. Credits can ONLY be claimed against tax liabilities as designated by law.

For more detailed information on a particular credit, please consult the Taxation and Revenue Department forms listed for that credit and statutes cited in this publication. The summary is accurate as of the revision date found at the bottom of this page. Taxpayers should be aware that subsequent legislation, regulations, court decisions, revenue rulings, notices and announcements may affect the summary's accuracy.

If you have applied for a credit and the credit has been approved, you may then claim the tax credit as specified in your approval letter or on your certificate. You may file your return and attach all the necessary documents to claim the credit through the Department's electronic filing system, the Taxpayer Access Point, located at <https://tap.state.nm.us>.

When filing an electronic return through a third-party vendor make sure that the associated approval (certificate, letter, allocation) and claim form (s) are attached to your return submittal. If you are unable to attach documents to your e-filed return, the documents may be mailed to the Business Credit Claims Processing Unit at P.O. Box 5418, Santa Fe, NM 87502-5418. Information for other state agencies you may need to contact as part of the application process may be found starting on page 37.

For tax years beginning on or after January 1, 2007, a taxpayer who files a New Mexico personal income tax return, who meets the definition of an accredited investor, and makes a qualified investment may claim a credit for 25% of the investment in a qualified high-technology or manufacturing business. Accredited investors may claim the angel investment credit for not more than one qualified investment per investment round and may claim the credit in no more than five qualified businesses per tax year. A claim for the credit may not be made or allowed with respect to any investment made before January 1, 2007, or after December 31, 2030.

A qualified investment means a cash investment in a qualified business for equity, but does not include an investment by a taxpayer, or a member of the taxpayer's immediate family, or an entity affiliated with the taxpayer, which receives compensation from the qualified business in exchange for services provided to the business within one year of investment.

Some of the requirements of a qualified business are that it maintains its principal place of business and employs a majority of its full-time employees, if any, in New Mexico and a majority of its tangible assets, if any, are located in New Mexico, and that it engages in qualified research or manufacturing activities in New Mexico. The business must not be engaged in or is not primarily organized as certain specified business types, among which include credit or finance services, investment, insurance, real estate, construction or contracting, consulting, utility services, mining, publishing, broadcasting, and internet operating services. How to apply: To qualify, a taxpayer must apply for a certificate of eligibility for the angel investment credit using **Form TRD-41404**, Angel Investment Application. The application should be filled out separately by the accredited investor and qualified business. Completed applications will be considered in the order received. How to claim the credit: A taxpayer must submit a completed **Form RPD-41320**, Angel Investment Credit Claim Form, and a copy of the certificate of eligibility to Tax & Rev. For tax year 2014 and prior tax years, used credit may be carried forward for 3 consecutive years.

A film production company's budget for direct production expenditures and postproduction expenditures is certified during a preproduction meeting with the New Mexico Film Office. The aggregate amount of claims to be authorized for payment in any fiscal year is currently \$110 million, and each fiscal year from 2024 through

2028 it will be increased by ten million dollars. If this threshold has been met for the year, a claim for credit shall be placed at the front of the queue in the order in which the return was filed. The aggregate amount of credits claimed for that fiscal year appear on Tax & Rev's website. The Film Office is prohibited from certifying a film production if the total claims would be in excess of \$100 million dollars over the threshold. Excluded from the threshold are the approved film credits of a New Mexico Film partner, a film production company that has made a commitment to produce films or commercial audiovisual products in New Mexico and has purchased or executed a ten-year contract to lease a qualified production facility.

Note: A film production company must provide the Film Office a projection of their likely credit claims in the fiscal year. The Film Office approves the film production company for eligibility. Tax & Rev determines whether the film production company's expenses are eligible. For more information about film tax credits, please see publication, FYI-370 *Information Regarding Film Production Tax Credits*.

How to apply for the credit: A film production company must first be approved by the New Mexico Film Office (NMFO). Once NMFO has reviewed and confirmed that all obligations are met by the production company, the Application/Memo package will be submitted to Tax & Rev. TRD then has 120 days from the date of the approval memo and receipt of a completed application including required documentation from the NMFO/production to complete the credit review for approval or denial as outlined in Section 7-1-29.2. The Tax & Rev reviewer will email an additional information letter (if applicable), and **Form ACD-31102, Tax Information Authorization Disclosure (TIAs)** to contact on application if not already provided with the application. The Tax & Rev reviewer will request submission of the required documentation via a secure electronic link. Once Tax & Rev has completed the review; production can submit for credit refund. See below for instructions. Filing for film credit refund may only occur at the end of company's taxable year. The Business Credit Approval or Denial Letter will be sent via email to the person on the application on or before 120-day deadline.

- **If approved, a NM Income Tax return will need to be filed for each year of expenditures (if there is more than one tax year) to receive the credit refund. The income tax return will need to include the necessary Schedule -CR, Form RPD-41228, *Film-Related Tax Credit Claim Form*, the Film Tax Credit Application, Business Credit Approval Letter, and Form RPD-41366, *Notice of Distribution of Film Production Tax Credit*.**

Taxpayers may be eligible for a credit if they are producing electricity by solar light or heat, wind, or biomass at a penny per kilowatt-hour up to 400,000 megawatt (MWh)-hours yearly per taxpayer for 10 years. The credit is allowed only for facilities that first produce electricity before January 1, 2018. The total amount of electricity that can qualify for the credit is two million MWh, plus an additional 500,000 MWh for solar facilities. The

definition of “biomass” was amended by the 2007 New Mexico Legislature to include a variety of organic materials that are available on a renewable basis, including landfill gas and municipal solid waste.

For a qualified energy generator using a wind- or biomass-derived qualified energy resource, the amount of tax credit is the lesser of \$.01 per kilowatt-hour of the first 400,000 megawatt-hours of electricity produced by the qualified energy generator in the tax year or the estimated annual production potential of the generating facility as determined by the Energy, Minerals and Natural Resources Department (EMNRD). For a qualified energy generator using a solar-light-derived or solar-heat-derived qualified energy resource, the amount of tax credit varies based on the tax year following the date the generator first produces electricity using the qualified energy resource. The credit rate starts at 1.5 cents in the first year of operation and increases in increments of ½ cent each of the next five years, to a maximum of four cents; the rate then will decline by ½ cent per year in the next four years to two cents in the tenth year of operation.

To qualify, the taxpayer must either hold title to a qualified energy generator or lease from a county or municipality, under authority of an industrial revenue bond, the property on which the generator operates. A taxpayer with at least a 5% interest in a qualifying energy-generating business may be allocated all or part of the right to claim the credit, but only if the business is taxed federally as a partnership and EMNRD has approved the allocation. A qualifying energy generator means a facility with at least one megawatt generating capacity located in New Mexico that produces electricity using a qualified energy resource and that sells that electricity to an unrelated person.

This credit, effective from the original date of application, continues until the facility either goes out of production for more than 6 consecutive months or its 10-year eligibility expires. The corporation may carry excess credit forward for 5 consecutive tax years. The credit may be refunded if the qualified energy generator first produced electricity after October 1, 2007. For additional qualifying information, please look at Tax & Rev’s application and claim form listed above.

How to apply for the credit: To obtain a certificate of eligibility, an allocation notices of the right to claim all or a portion of the renewable energy production tax credit, contact the Energy Conservation and Management Division of EMNRD. More about this can be found by visiting the EMNRD website at <https://www.emnrd.nm.gov/ecmd/tax-incentives/>.

Allocation to pass-through entity owners: A PTE may not claim the renewable energy production tax credit. Allocate the right to claim the credit to the PTE owners, partners, or members, by completing the EMNRD allocation notice, and submitting it to EMNRD for approval. Each owner, partner or member will receive a certificate for approval.

How to claim the credit: The claimant must attach a completed **Form RPD-41227**, *Renewable Energy Production Tax Credit Claim Form* and the certificate of eligibility, the yearly allocation notice approved by EMNRD, and the documentation to support the energy produced reviewed and approved by EMNRD for each year energy production is being claimed to the applicable tax programs return they are claiming the credit on. A taxpayer may apply for this tax credit for investments in constructing or renovating sustainable residential or commercial buildings that meet specific “green” building standards. The 2015 sustainable building tax credit is also available for the permanent installation of manufactured housing, regardless of where the housing is manufactured. The tax credit can be claimed by the owner of the building at the time it is certified as a sustainable building or by a subsequent owner if no credit has already been claimed. The rate of the credit ranges from \$0.30 up to \$6.50 per square foot and varies with the type of building, the total qualified occupied square footage of the building and the degree of energy efficiency incorporated in the building.

Effective January 1, 2017, the total amount of sustainable building tax credit certificates issued by EMNRD in any calendar year shall not exceed an aggregate amount of \$1.25 million with respect to sustainable commercial buildings, an aggregate amount of \$3.375 million with respect to sustainable residential buildings that are not manufactured housing, and an aggregate amount of \$375,000 with respect to sustainable residential buildings that are manufactured housing. For additional qualifying information, please look at Tax & Rev’s application and claim form listed above.

How to apply for the credit: An applicant can apply for certification of eligibility for the 2015 sustainable building tax credit to the Energy Conservation and Management Division of EMNRD. EMNRD determines whether the building meets the requirements as a sustainable residential or commercial building and determines the certification level for the building. More on how to claim the credit may be found by visiting the EMNRD website at <https://www.emnrd.nm.gov/ecmd/tax-incentives/>. You may also contact EMNRD by email at emnrd.taxcredits@state.nm.us or by phone at (505) 476-3372.

If the credit claimed the first eligible year exceeds the taxpayer's liability, the excess may be carried forward for up to 7 tax years from the tax year the credit approved for. Basic credit: A taxpayer who conducts qualified research¹ at a qualified facility in New Mexico – except at a facility operated for the U.S. government – may claim a basic credit equal to 5% of qualified expenditures. The 5% credit doubles when the qualified facility is in a rural area (that part of New Mexico outside Bernalillo, Doña Ana, and Santa Fe counties and the three-mile buffer zone around Bernalillo, Doña Ana, San Juan and Santa Fe counties and the municipality of Rio Rancho). Qualified expenses include rent, equipment, software, payroll, technical manuals and materials, and operation and maintenance of facilities.

Additional credit: A taxpayer may qualify for an additional 5% credit toward income tax liability by raising its in-state payroll \$75,000 for every \$1 million in qualified expenditures claimed. The minimum payroll increase is \$75,000. This credit also doubles if the qualified facility is located in a rural area. Except for qualified small businesses (defined below), no taxpayer may claim additional credit in an amount which exceeds the amount of income tax or corporate income tax due in the taxable year claimed. For additional qualifying information, please look at Tax & Rev's application and claim form listed above.

For the most part the design of custom software does not meet the definition of qualified research unless a software company conducts research and design of an entirely new software product. Qualified research should include all activities related to new or improved function, performance, reliability, or quality. Style, taste, and cosmetic or seasonal design are excluded as qualifiers (Section 7-9F-3).

Tax & Rev will notify you if you are approved.

Allocation to pass-through entity owners: Either a pass-through entity or an owner may claim basic tax credit, however, only an owner of a pass-through entity may claim the additional credit. A pass-through entity may pass credit to its owners, partners or members using **Form RPD-41387**, *Notice of Distribution of Technology Jobs and Research and Development Tax Credit*.

The amount of the credit shall equal the amount of qualified expenditures incurred by a national laboratory to provide technology readiness assistance to a business, not to exceed \$150,000 in a fiscal year per business. The annual aggregate amount of credits allowed per national laboratory per fiscal year shall be limited to \$1,000,000 beginning July 1, 2022. If more than one national laboratory claims a technology readiness gross receipts tax credit, those laboratories shall jointly submit an annual report. This annual report must summarize activities related to and the results of the technology readiness assistance program(s) created by the national laboratories.

The annual report will include a description of each business's technology that has received technology readiness assistance, including progress toward technology maturation and whether and to what extent the

business is still doing business in New Mexico. Also included in the report will be the results of surveys of the business provided technology readiness assistance, the total amount of the technology readiness gross receipts tax credits received in the previous fiscal year, and an economic impact study performed by an uninterested third party.

NOTE: When applying the credit to **Form TRD-41413**, *Gross Receipts Tax Return*, you must pay any gross receipts tax due over the state rate of 4.8750%. This will ensure that the local options gross receipts are being paid as required by statute.
